Bruce Mau: MC24 Bruce Mau, 2020-06-17 24 global, generous, and galvanizing principles to overhaul the way we think and to inspire massive change Bruce Mau has long applied the power of design to transforming the world. Developed over the past three decades, this remarkable book is organized by 24 values that are at the core of Mau's philosophy. MC24 features essays, observations, project documentation, and design work by Mau and other high-profile architects, designers, artists, scientists, environmentalists, and thinkers of our time. Practical, playful, and critical, it equips readers with a tool kit and empowers them to make an impact and engender change on all scales.

Advances in Image and Video Technology Toshikazu Wada, Fay Huang, Stephen Lin, 2009-02-13 This book constitutes the refereed proceedings of the Third Pacific Rim Symposium on Image and Video Technology, PSIVT 2008, held in Tokyo, Japan, in January 2009. The 39 revised full papers and 57 posters were carefully reviewed and selected from 247 submissions. The symposium features 8 major themes including all aspects of image and video technology: image sensors and multimedia hardware; graphics and visualization; image and video analysis; recognition and retrieval; multi-view imaging and processing; computer vision applications; video communications and networking; and multimedia processing. The papers are organized in topical sections on faces and pedestrians; panoramic images; local image analysis; organization and grouping; multiview geometry; detection and tracking; computational photography and forgeries; coding and steganography; recognition and search; and reconstruction and visualization.

Massive Change Bruce Mau, Jennifer Leonard, Institute Without Boundaries, 2004-10 Massive Change is a modern illustrated primer on the new inventions, technologies, and events that are affecting the human race worldwide. The book is a part of a broader research project by Bruce Mau Design intended to provoke debate and discussion about the familiar objects and techniques that are transforming our lives. In essays, interviews, and provocative imagery aimed at a broad audience,

Massive Change explores the changing force of design in the contemporary world, and in doing so expands the definition of design to include the built environment, transportation technologies, revolutionary materials, energy and information systems, and living organisms. The book is divided into 11 heavily illustrated sections covering major areas of change in contemporary society - such as urbanism and architecture, the military, health and living, and wealth and politics. introductory essay, extended captions, and interviews with leading thinkers, including engineers, designers, philosophers, scientists, architects, artists, and writers. Concluding the book is a graphic timeline of significant inventions and world events from 10,000 B.C. to the present. Massive Change is the umbrella name for wide-ranging research project initiated by Bruce Mau Design and the Institute Without Boundaries, a new post-graduate design program headquartered at his studio. The project will include not only this book but also a travelling exhibition, public events, an on-line forum, a documentary television project, posters, and a product line. The overall aim of the project is to explore the changing force of design in the contemporary world. The book focuses on the powerful, newly designed technologies and systems (and the failure of outmoded ones) that increasingly influence our daily lives. the debate about genetically modified foods, the race to decode human the human genome, the development and worldwide trafficking of sophisticated military weapons - even the increasingly intrusive security systems at airports: all are examples of massive changes that involve the field of design. The book presents images and text that explore the impact of these subjects, both the seemingly mundane as well as the mind-boggling and microscopic. As the text in Massive Change explains: No longer associated simply with objects and appearances, design is increasingly understood in a much wider sense as the human capacity to plan and produce desired outcomes. The book is divided into 11 sections, each focusing on a specific economy at work in the world today, both the traditional (such as manufacturing), and the often-invisible (globalization and politics). The pages combine images, extended captions, general essays, and interviews in a clean, simple design. The imagery in Massive Change is irresistible, and stands alone as a compelling reason to own this book. beautiful. For example, a photo of a smoky blue blob, as the caption explains, is really Aerogel, a material developed by NASA to collect fast-moving space dust. And a featherless, naked chicken staring at us from the page is just that: a new, genetically engineered broiler that requires no plucking and yields more meat, a boon to poultry producers yet a frightening harbinger of our future food supply. Massive Change is a well designed, intelligent, visually provocative exploration of the myriad subjects percolating through popular culture: those we read about in magazines and on Web sites but rarely understand in any meaningful way. It poses the question: Now that the human race can do almost anything, what will we do next?

Advances in Multimedia Information Processing - PCM 2004 Kiyoharu Aizawa,Yuichi Nakamura,Shin'ichi Satoh,2004-10-29 Welcome to the proceedings of the 5th Pacific Rim Conference on Multimedia (PCM 2004) held in Tokyo Waterfront City, Japan, November 30-December 3, 2004. Following the success of the preceding conferences, PCM 2000 in Sydney, PCM 2001 in Beijing, PCM 2002 in Hsinchu, and PCM 2003 in Singapore, the 5th PCM brought together the researchers, developers, practitioners, and educators in the field of multimedia. Theoretical breakthroughs and practical systems were presented at this conference, thanks to the support of the IEEE Circuits and Systems Society, IEEE Region 10 and IEEE Japan Council, ACM SIGMM, IEICE and ITE.

PCM2004 featured a comprehensive program including keynote talks, regular paper presentations, posters, demos, and special sessions. We received 385 papers and the number of submissions was the largest among recent PCMs. Among such a large number of submissions, we accepted only 94 oral presentations and 176 poster presentations. Seven special sessions were also organized by world-leading researchers. We kindly acknowledge the great support provided in the reviewing of submissions by the program committee members, as well as the additional reviewers who generously gave their time. The many useful comments provided by the reviewing process must have been very valuable for the authors' work.

This conference would never have happened without the help of many people. We greatly appreciate the support of our strong organizing committee chairs and advisory chairs. Among the chairs, special thanks go to Dr. Ichiro Ide and Dr. Takeshi Naemura who smoothly handled publication of the proceedings with Springer. Dr. Kazuya Kodama did a fabulous job as our Web master.
